

CS Platform ver. 1.0.13 Release Note

Release date: 1/24/2024

Overview

The Kompany is excited to announce the first release of our first zero trust cybersecurity platform, CS Platform. With the CS Platform you can centrally manage and view all Operational Technology (OT) assets managed by the Kompany solutions and stay up-to-date about asset security statuses. The CS Platform offers useful data visualization of key security indicators to help you monitor various sensors across the following levels: attack surface management, life cycle protection, and detection and response.

Features

The first release of the CS Platform offers the following features:

- **Integration:** Supports integration with the Kompany Product B series products.
- **Dashboard:** Provides visualization of data gathered from assets managed by the Product B series products.
- **Ticket Tracking:** Track critical security issues that require immediate action.
- **Security Posture:** Monitor your assets and sites overall health levels.
- **Sensor Management:** Manage all Product B series sensors, monitor Product B sensor data and insights, and export data.
- **Admin Management:** Manage company-level user roles and permissions, asset groups, and other system settings, such as firmware updates and log management.

Compatibility

CS Platform is compatible with the following software:

Compatible Hypervisors:

- VMware ESXi 6.5 or later versions
- VMware Workstation 17 Pro or later versions

Compatible Browsers:

- Google Chrome 87 or later versions
- Microsoft Edge 79 or later versions
